

Intervention

A participative workshop to list concerns and to find solutions for them.

Change Phase

INTEREST / TRIAL

Description

Mention the change very briefly. Let people express their concerns and just make a list (No discussion! Just a list). Then categorize the concerns and together as a group, try to find solutions. Answer the concerns/questions you can answer. Come to an agreement about who is going to do what to solve some of the other concerns. When a concern is not solvable, just say it!
